Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Nissan Diesel Motor Co. Ltd.

The patent by Nissan Diesel Motor Co. Ltd. (JP 017083/1980) shows a valve guide structure for supporting a stem of a valve by an inner peripheral surface of a valve guide so as to restrict moving directions of the valve. A recess (2a) on the inner peripheral surface of the valve guide extends downwardly from an upper end of the valve guide along the stem of the valve so as to form a clearance between the valve guide and the stem of the valve.

The recess on the valve guide has a lower end lower in position than a thinnest portion of the valve guide.

The recess has a taper with reduced inner diameter toward a lower end thereof.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nissan Diesel Motor Co. Ltd.

The patent by Nissan Diesel Motor Co. Ltd. Does not show the outer periphery of the valve guide to be formed with an engagement groove for engagement with a stem seal to prevent intrusion of oil. It is the view of the examiner that it is inherent that the stem seal is fastened in some undisclosed manner and that it would be an obvious choice of design to fasten the seal to the valve guide with a corresponding groove.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Benton whose telephone number is (571) 272-4838. The examiner can normally be reached on M-F 9:30-6:00.
